Three Sci-Fi style Light Commercial buildings, I've included old 32mm sized Hex's on page 4 and the new 33mm Hex bases on page 3. I would recommend printing a copy of the hex bases page in "draft" first and checking the tile size against your map. I found some significant variability across the official maps depending on their age:

I've exported a 38mm (1.5inch) version - check my blog for the other size.

Sorry No cut files. Hand cutting is pretty quick

To help prevent your tiles slipping all over the place if you paint a thin layer of PVA glue on the backs it creates a sort of rubbery semi-grip finish although they will still slip just not as badly. There is a paint on rubber product but I couldn't locate any down under.
