Stands

www.sirrobo01.wordpress.com

Paper flight stands for use with my 2.5d aircraft, I've included 2 different types of numbered stands a 1-4 set and a 1-6 set I've also added a blank set. I primarily use mine for Wings of War/Glory.

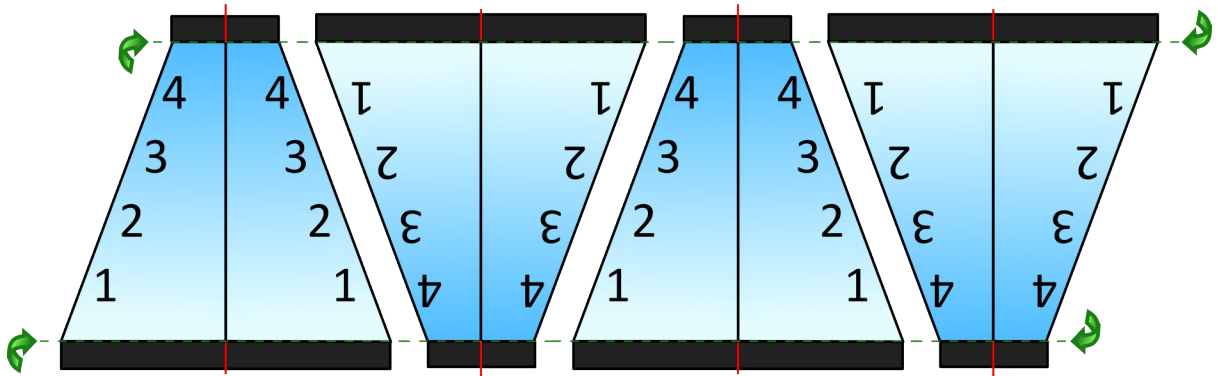

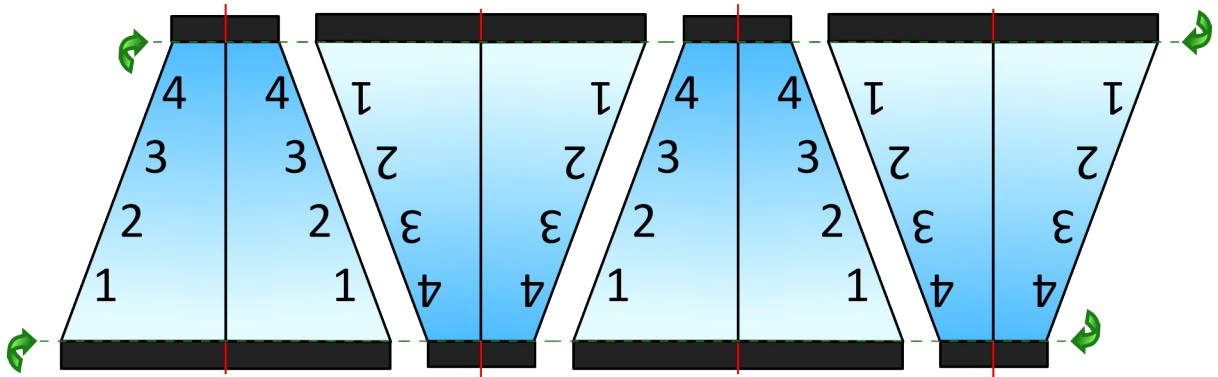

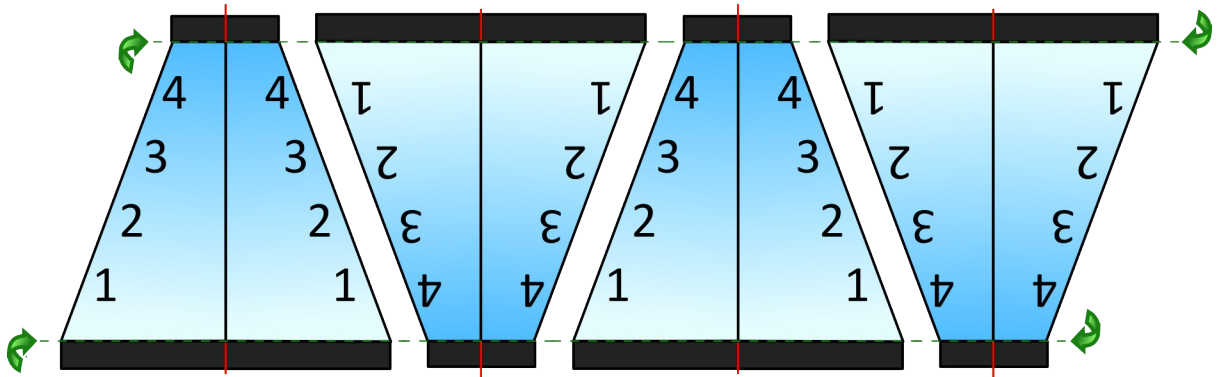

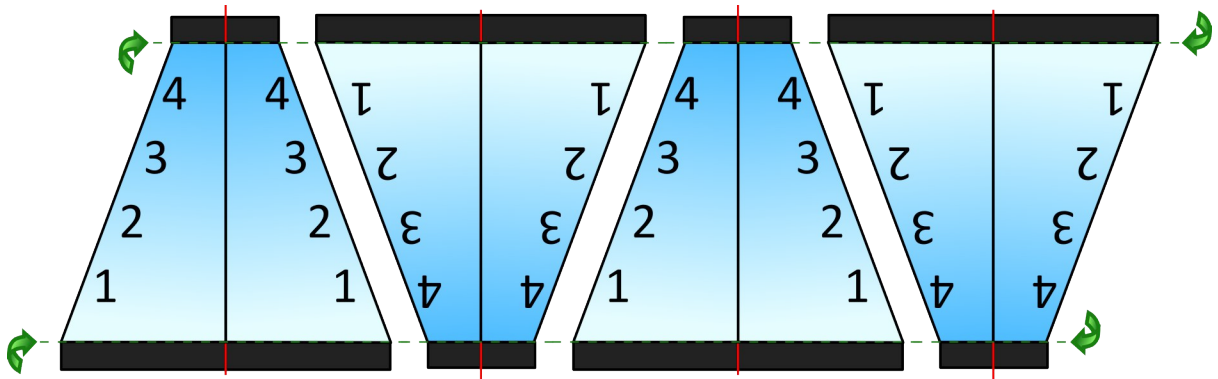

Use a paperclip on the stand to simply indicate the current flight level of the aircraft.

Mine were all made from 200gsm card about 80lb cover stock if I've done the conversion right.

Tips for Assembly

- ~ Use Super Glue on the top and bottom T pieces to make them stronger, add a thin piece of paper to increase the strength (80gsm paper max) (Four)
- ~ Cut the front ends of the T's at a 45 degree angle this makes them easier to insert (Five)
