Loosely based on the MKII-MKV Spitfire and scaled to 1:200

I've included both a high contrast colour scheme (pictured above) and a more accurate historically coloured page. I found the high contrast ones looked better on the gaming table, but use what you prefer.

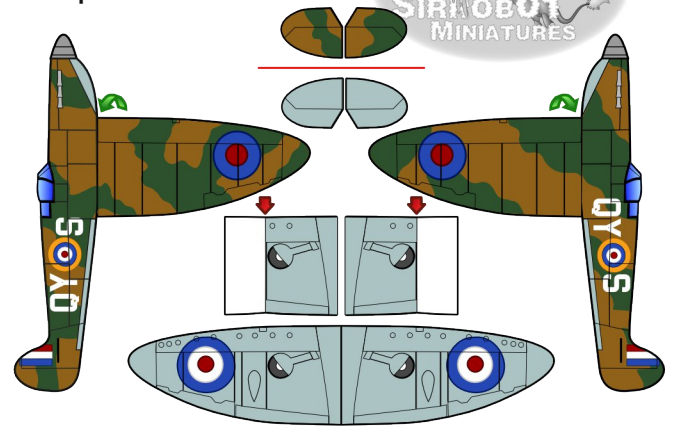

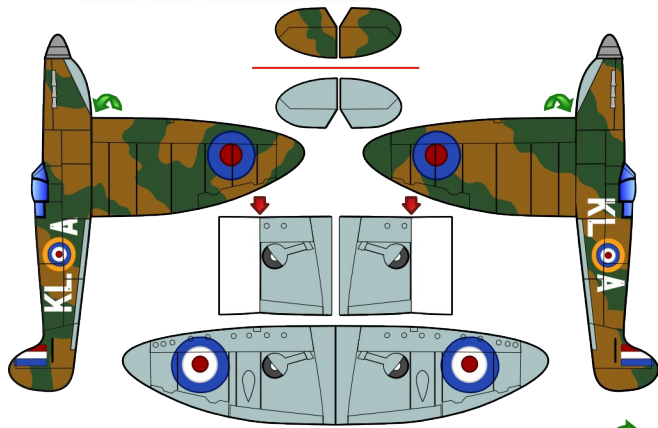

I'll be using these to represent Spitfire's during the Battle of Britain but I plan to do further colour schemes for later in the war and other theatre's. So keep an eye on my blog to pick those up.

To learn more about the Spitfire checkout the Wikipedia article:
http://en.wikipedia.org/wiki/Supermarine_Spitfire

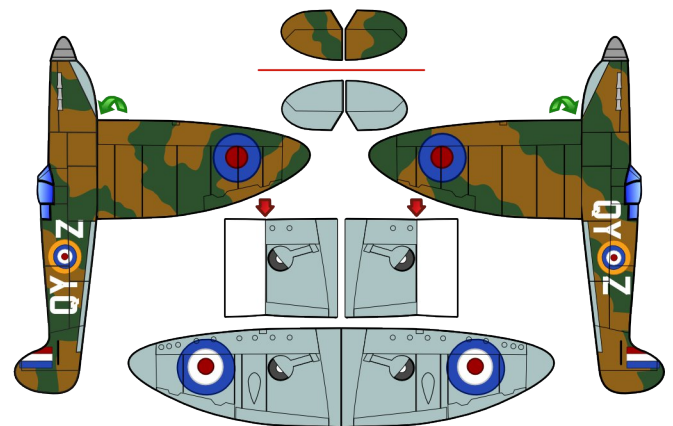

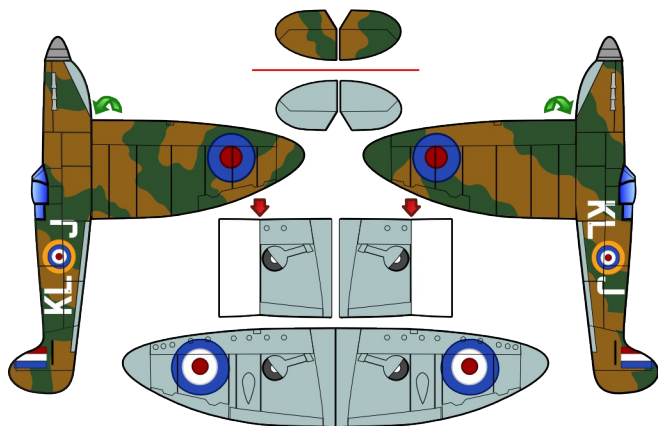

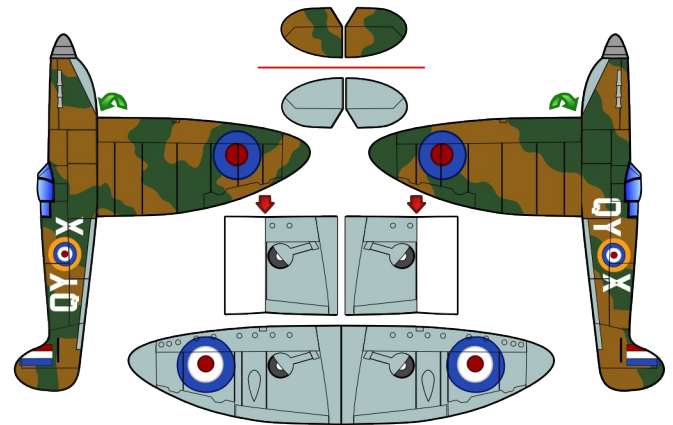

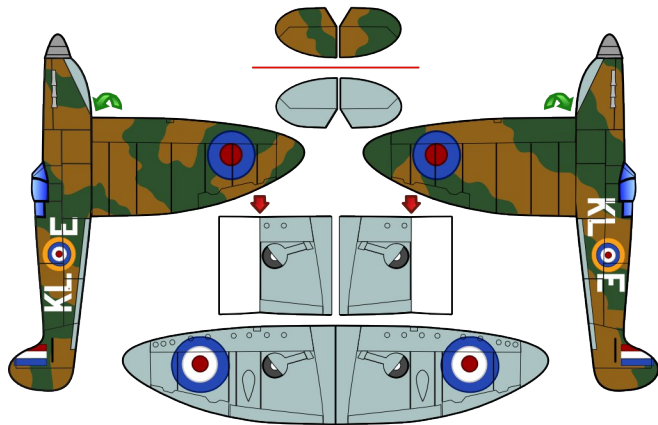

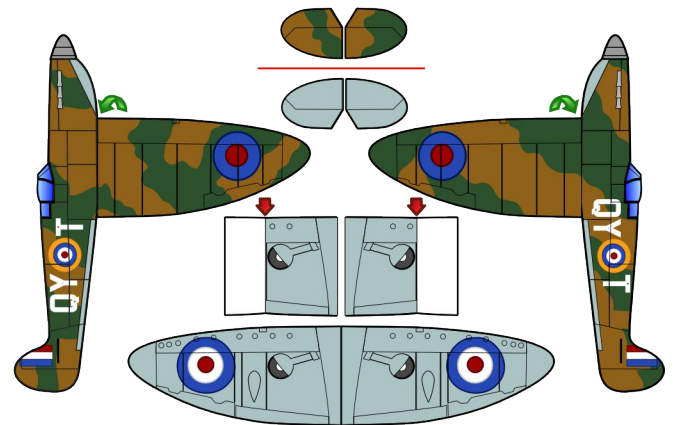

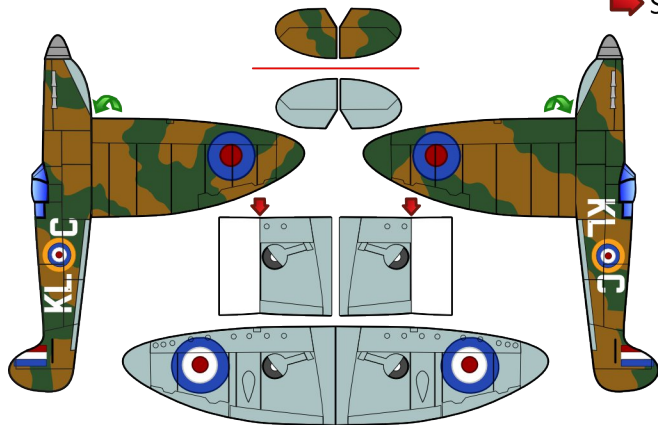

Special thanks to Reivaj for his innovative basing style:

Tips for Assembly

- ~ Use PVA glue or another paper glue for fuse, wings and standholder tabs
- ~ Use Super glue for the Horizontal Stabiliser - Sorry they are
- ~ If not using card stands omit steps 3 and 4
